

HMGP –PROPERTY INFORMATION WORKSHEET

THIS FORM CAN ONLY HELP

The Village would again like to stress the importance of the residents and business and property owners to fill out the Property Information Worksheet. As part of the second phase of the Hazard Mitigation Grant Program application process, the State will want to compile a benefit cost analysis to ensure in the “long run” the benefit will outweigh the cost of the project. Therefore, we need to provide information regarding the losses sustained as a result of Hurricane Sandy. In addition to the losses to the structure and actual property involved (like your house or building), eligible requirements include, any and all contents, vehicles, landscaping, loss of wages, displacement costs, etc. **This information can only HELP you.** If awarded these funds, the Village can address its long standing drainage problem, replacement of bulk heads and elevation of roads, and other necessary repairs. Your information will be part of a package where an average will be calculated for the Village as a whole and presented to the State. Again, participating in this task can ONLY HELP YOU and our Village as a whole. We thank you in advance as this is an amazing opportunity for the Village and we may never be in this position again.
